Subject: Re: FED - CFM - Supplemental GW Sampling Program

Andrew, as discussed in the scoping meeting of January 31, 2002 and subsequent discussions, in addition to the four Facility monitoring wells (MW-1, MW-4, MW-6, and MW-10) and two downgradient residential wells (Res-8F and Res-41) EPA is requesting that FED include the off-property well Res-17 in this sampling event. As you know, Res-17 is the well that was sampled a few years ago at the PECO location (identified as their Planebrook Station) adjacent to the Foote property and would serve as an upgradient, background well.

Sample results from this well would be used as a baseline to compare the other results. Let me know if there are any requirements we have to meet for PECO to authorize this sample.
